FOREWORD—Please Read

We have harvested the finest crop of bulbs ever, and can assure you bulbs of the very best quality. If for ANY reason, you are not highly pleased with what we send you, we HOPE you will let us know at once and we will gladly do everything possible to adjust matters. You will note we have dropped quite a few we listed last year, but have added some fine new ones in their place. We honestly believe every one we have listed is one of real merit, and many are outstanding. Please look them over carefully before you order.

OUR OWN INTRODUCTIONS

CHINOOK. (532 class). This one leads the parade. It is a pure, rich, clear salmon with no markings. A real sensation. Grows nearly six feet tall, and always straight. Opens 9-11 6" lightly ruffled florets with plenty more showing color. Holds its size to the last bud. An extra good keeper. Production and germination good. A basket of Chinook is really breath-taking. It will win the blue in any competition. It will be in great demand soon. Better get a start now. Prices: L., \$2.50, 3 for \$6.00; M., \$2.00, 3 for \$5.00; S., \$1.50, 3 for \$4.00; Blts., 15 for \$2.00. Special growers' units on request. Write for them.

Don Henderson of Iowa writes: "The Chinook bulb gave me two fine spikes. Both were entered in our state Glad show at Waterloo (1949). One placed first in its color class, the other 2nd, in recent introductions. Everyone was impressed by the clarity of its color."

Mr. Wesselman, of Canada, writes: "My, what a glad. I believe it could be called sensational. Height, 60", flower head 30", florets 7" with 9 open on a 24 bud spike. Perfect facing and placement."

Wendall H. Keen, of California, writes: "It is in my opinion, the greatest glad introduced since Picardy. It out-performed anything in my entire patch. It was sensational to say the least. 24 buds, 10 open, 9 showing color."

"Again I say, it is truly a wonderful Glad anyone should be proud to have."

Chinook has won a number of firsts, and at least three divisional championships this year. This is a remarkable record when one considers that none of those who won had but a very few bulbs. When stock gets more plentiful they will really be doing some winning. This is also true of LaValle, Nellie Lou, and the rest of my introductions.

Dr. Cason of Tenn., writes ('49): "Chinook, the most robust grower in our entire patch; 28" head, 18 buds, 6 open. Smooth deep salmon pink with absolutely no flecking. Slightly ruffled. Very favorably impressed."

John H. Keiser of Indiana writes (1950): "In my opinion, Chinook is about the greatest Glad to date. Had one that would have placed in any show. 30" flower head and perfect in every way, but too late for show."

Joe Wood, Yakima, Wash. (1950) writes: "Your LaValle, Chinook and Nellie Lou, are honeys and no mistake."

In the 1950 NEGS. Yearbook, page 77 you will see Mr. Chas. Larus lists Chinook, LaValle, and Nellie Lou among the 10 best of the 1949 releases.

This August I took one spike each of Chinook, LaValle, Nellie Lou, and Rose Plume to Yakima, Washington, 376 miles. Won three Blues and one Red. And LaValle was judged the best recent introduction. Mr. Merrin, Olympia, Washington, in the Amateur class, won first on LaValle and Keefer. His spike of Keefer would have won first in any show.

LaVALLE (507 class)

LaVALLE is a light ivory cream with an orange feather in throat that adds to its beauty. Consistently grows five feet tall. Opens 7-9 5½" florets on a 19-bud spike, always straight. The florets are so rich in color they attract immediate attention. Easily the leader in this class. Production and germination good. This one will win in any competition if in good condition. Price and Growers' units same as Chinook.

Sidney Mode of Canada writes ('49): "Your LaValle is grand. A beautiful, healthy, vigorous variety which is without doubt the leader in the 507 class. It stood our adverse weather and produced gorgeous spikes. I could do some winning with it if I had sufficient stock."

O. M. Farrington, Kentucky, writes ('49): "My guess is, LaValle will be heard from not only in the North, but also in the South and West. LaValle was one of the three best in my test plot, and the best of the new introduction."

With the limited stock out, I am receiving many reports of its winnings. Best recent introduction for Mr. Lasch, at Purdue, Ind., 1950. First and best recent introduction at Yakima, Washington, 1950. Also made at least two divisional champions in 1950.

Be sure and get your Growers' Unit, reduced prices on all our originations.

NELLIE LOU (542 class)

Almost a true flesh pink with small strawberry throat mark. Grows very tall and straight. Opens 8-10 5½" lightly ruffled florets on a 20-bud spike. Excellent keeper, and good shipper. It will open to the last bud, and holds its size almost to the top bud.

This is not just another pink, but something very different and really outstanding. Have never grown anything like it, or more beautiful. It will win in any competition. A strong, healthy grower. Production and germination just fair. It can take a lot of bad weather, and still make show spikes. Price same as Chinook.

Ray Koenig, Waterloo, Iowa, writes (1949): "Nellie Lou came almost right for our State Glad Show in Waterloo. Grew 70" tall in field. Cut it on Wednesday for our show on Saturday. Held up well. Opened 7 florets with 8 showing color, on a 19-bud spike. Won first in its class. Also won a vase for the longest flower head in show, 32½". I think you have a real grower in Nellie Lou. Also cut another good spike from same bulb."

Sidney Mode, Canada, writes (1949): "Nellie Lou grew nearly six feet tall. Had very large florets on a tall, straight spike. It was one of my prize winners. Was not affected by our severe drouth and heat."

You will never regret getting a good start of Nellie Lou. It will be listed for years among the best.

ROSE PLUME (462 class). It will often make the 562 class.

Here is a complete break in color. Nothing like it. A very soft velvety rose that leans to the red side of rose. No markings of any kind, but a little lighter in throat. When well grown, it will open 10 or more 5½" florets on an 18-bud spike. Has a rich glossy sheen that makes it very attractive. Quite an early bloomer. Production and germination good. Even the bulblets will often bloom. This is one you are sure to like. Price the same as Chinook.

Bruce Collins of Michigan writes ('49): "Your Rose Plume so far is my personal choice. It is one of the

finest glads ever introduced, and I love it. It is simply beautiful, and easily opens 10 in the field. The color attracts the eye from any viewpoint."

Mrs. Merrill, Oregon, writes: "Rose Plume is a beautiful flower. The color is out of this world. Some of the florets were nearly double."

Rose Plume will attract possibly more attention than anything in the garden, because it is so different, and so lovely.

BUFF QUEEN. This was my only 1950 release, and not many bulbs out so far, but many good reports are coming in from it. It should be a great commercial and show glad. It is a rich orange buff with almost no markings, however it often has some flecking on the edge of the florets that really seems to add to its beauty. Consistently grows 5½ feet tall, and will hold ten or more 6" florets open in the field. Makes a long straight spike. It will stand the hot weather with the best of them. Have bloomed it six years, and know it will make good. Personally, I believe it will rank right along with Chinook, LaValle, Nellie Lou, and the rest of my releases. It is a rather late bloomer, and should be planted early if you want to hit the shows.

Priced the same as Chinook.

D. M. Merrin, Olympia, Wash, writes (1950): "Saw a very poorly grown spike at the Everett show, but when ours bloomed a week later we were really thrilled. From a small bulb, it opened 7 5½" florets. Perfect placement and straight stem. The color was beautiful, it did fleck slightly which really adds to its charm. We certainly hope to hit the shows with it next year."

John H. Keiser, Iowa, writes, October, 1950: "Buff Queen was a beautiful glad, of perfect form. Opened 9-11 florets, on a 15-bud spike. A healthy grower, but a late bloomer."

KEEFER (Lines) 478 class. Here is a mighty interesting deep blue, bordering slightly on the purple side. Possibly the largest of the blues. Easily a leader in its class. Flecks some in hot weather, but still is a great favorite, especially with the ladies. Opens 9 or more 5½" florets on a nice long spike, with all the rest showing color. The buds are simply beautiful just before they open. Almost an Indigo blue and just like velvet. As they open they turn lighter in color. A great exhibition Glad. Scored 80 in the R. I. Trial Gardens. An extra early bloomer. **Price: L., \$1.50, 3 for \$3.50; M., \$1.00, 3 for \$2.50; S., 75c, 5 for \$3.00; Blts., 10 for \$1.00.**

D. M. Merrin, Olympia, Wash., writes: "Won a first on Keefer at Yakima show. It also won for the most buds in bloom in good condition over the entire show."

Bruce Collins, Mich., writes ('49): "Keefer for me is more on the purple side, and easily opens 12 florets on a tall straight spike. Especially for exhibition. I believe it will beat any in commerce. Wish I had some for our local shows, it would make the boys sit up and take notice."

LOOK HERE

In order to get my originations before the public, so as to acquaint them with their fine qualities, I am making this sensational offer. I will give absolutely free, one large bulb of either Chinook, LaValle, Nellie Lou, Rose Plume, Buff Queen or Keefer (your choice), with **each** \$5.00 order you send me. Two bulbs for a \$10.00 order, and so on up. You may select anything from my catalog, but it will be to your best interest to order all you can of my originations. In addition, I will issue you a credit slip worth \$2.00 (to be applied on your next order)

for each blue ribbon you win with any of my originations in 1951 from stock ordered from me in 1951. And \$5.00 for each divisional Champion. \$10.00 for each Grand Champion. Better get some of my Growers' units, and go after those blue ribbons. Others are winning who have but a few bulbs, and so can you.

A LITTLE SECRET

To you amateurs, here is a little secret. Most large bulbs will throw two or more spikes, but none will be as large and strong as where there is but one spike. So if you want a good large show spike, get a large, healthy bulb, one we call a "Jumbo" and remove all but the best eye, so it will only send up one spike. To do this, remove all the husk, then with a sharp pointed knife, dig out all but one eye. Do this just before planting. Where possible, see that your show glads get plenty of water from the time they start the fifth leaf, until bloomed. It may be necessary to stake some to keep them nice and straight. If they should bloom a few days before the show, cut them when they have several florets open and place in water, and put in a "Meat Market Cooler" (temperature above freezing). This way you can hold them several days. Bring them out JUST at show time, as they will not hold up too long after this treatment. If you want these "Jumbo" bulbs please state same on your order. They will be given ONLY on our originations.

THE MAGIC WEEDER HOE

Something different. Nothing like it. Takes the back break out of hoeing, because one seldom ever has to stoop to pull a weed. This hoe gets them in between the plants, and right up against them without damaging the plant in the least. Being so light in weight, and easy to handle, women love to work with it. You can hoe more, in less time, with less effort, and do it better, than with any other hoe made. Made of the best material, it will last a lifetime.

Use it one full summer, and if you are not delighted with it, return it and I will refund your money or give you full credit on a bulb order for the next spring. But I know you will be thrilled with it.

Being light in weight, it is not recommended for large, rank weeds. Should be used when weeds are small.

You may include the price, \$2.00, in your bulbs order, and still get your premium bulbs. One hoe and a \$3.00 bulb order, entitles you to one premium bulb. One hoe and an \$8.00 bulb order entitles you to two Premium bulbs, and so on up. Take it from me, you'll love this hoe, and when your neighbors see it, they'll want one. Once you try it, you would not part with it for many times the price you paid for it.

Price, \$2.00. Three for \$5.00

Geracia Growers, Fort Myers, Fla., writes, Nov. 25: "We were well pleased with your Miracle Weeder Hoes you shipped us this spring, and would like 5 more. Check enclosed for same." Signed, S. Geracia.
